PREFACE

This publication is a collection of the commonly used statistical series on Newfoundland & Labrador. In order to keep the publication at a reasonable size monthly and subprovincial data are not included. As well only a small number of census tables have been included.

The following should be noted when using the publication:

i) The publication is arranged into 24 sections and the headings of these sections are given in The Table of Contents.

ii) Each section contains notes and explanations on the tables.

iii) The source of the data is indicated at the foot of each table.

iv) Also at the foot of each table is a heading called "Additional Data". This indicates when the data are available more frequently than annually (such as monthly); for a smaller geographic area; or in greater detail.

v) This volume contains most of the information included in earlier volumes.

Any questions or comments on this publication should be addressed to:

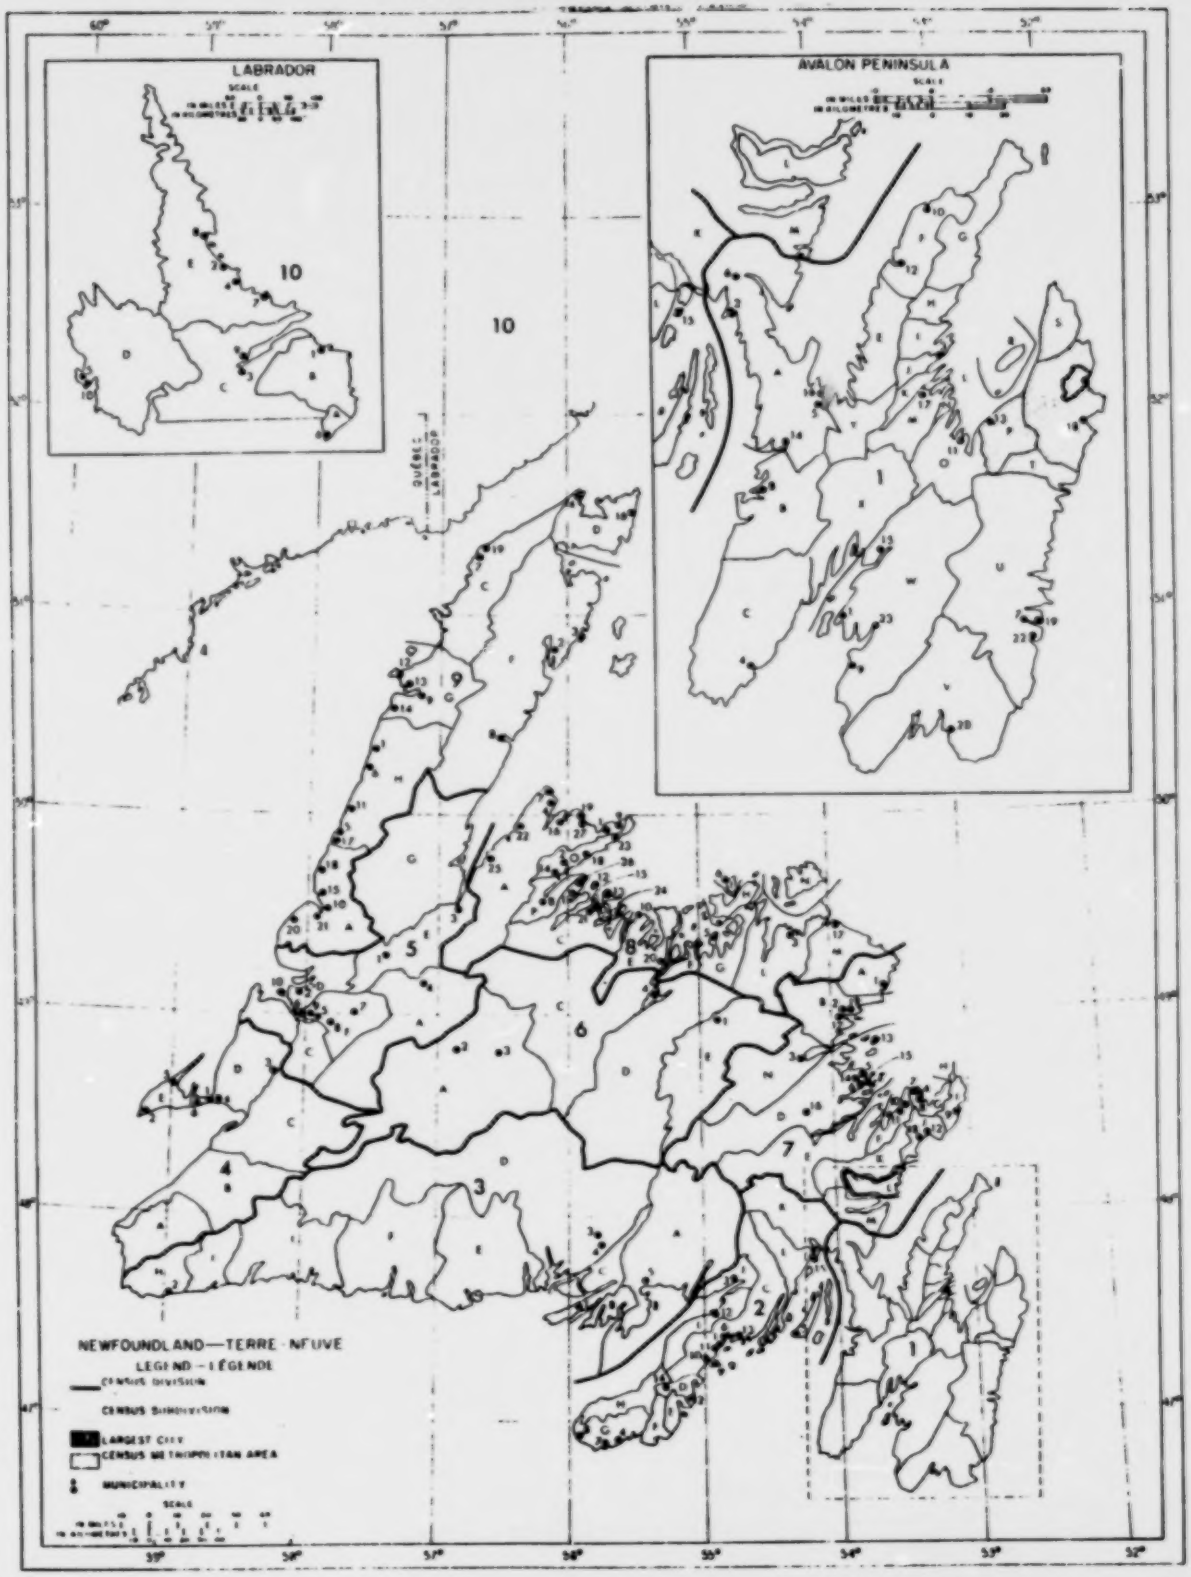
of Newfoundland & Labrador 1971



SECTION A

POPULATION AND VITAL STATISTICS

SECTION "A"

Table A-1

Population

De jure (resident) population as enumerated in Census years.

Table A-2

See Table A-1

Births

Infants born alive, i.e. excluding stillbirths.

Deaths

Deaths excluding stillbirths.

Net Natural Increase

Net natural increase is calculated by subtracting births from deaths.

Table A-3

See Table A-1

Age

Age classifications in the census are based on a definition which specifies completed years of age at last birthday prior to the census date.

Table A-4

See Table A-1

Marital Status

Refers to the conjugal status of a person.

Single: Persons who never married (including all persons less than 15 years) and persons whose marriage was annulled.

Married: Persons whose husband or wife is living, unless the couple are separated or a divorce has been obtained; persons living common-law are considered as "Now Married".

Widowed: Persons who have lost their spouse through death and who have not remarried.

Divorced: Persons who have obtained a legal divorce and have not remarried.

Separated: Persons who have been deserted or who have parted because they no longer want to live together, but have not obtained a divorce. They may or may not be legally separated.

Table A-5

See Table A-1

Table A-6

See Table A-1

Census Division

Statistical areas that have been created as an equivalent for counties and delineated by Statistics Canada in co-operation with the province. There are ten Census Divisions in Newfoundland. See map section.

Table A-7

See Table A-1

Table A-8

Household

A person or a group of persons occupying one dwelling unit is defined as a household. The number of households will therefore be equal to the number of occupied dwellings. See notes in Table P-2 for definition of "dwelling".

Table A-9

See Table A-1

Table A-10

Family

Refers to a husband and a wife (with or without children who have never married, regardless of age), or a lone parent of any marital status, with one or more children who have never married, regardless of age, living in the same dwelling. For census purposes, persons living in a common-law type of arrangement are considered as now married, regardless of their legal marital status.

Table A-10

See Table A-10.

Children

Child refers to sons and daughters (including adopted children and stepchildren) who have never married, regardless of age, and are living in the same dwelling as their parent(s). Sons and daughters who have ever been married are not considered as members of their parents' family, even though they are living in the same dwelling.

Notes: 1 - Includes persons who did not state age.
2 - All 1971, 1976, 1981 & 1986 census data have been subjected to a confidentiality procedure to prevent the possibility of associating small figures with any identifiable individual. The particular technique used is known as "random rounding". Under this method, all last or "unit" digits in a table (including all totals) are randomly rounded (either up or down) to "0" or "5". This technique provides the strongest possible protection against direct residual, or negative disclosures without adding any significant error to the census data. However, since totals are independently rounded they do not necessarily equal the sum of individual rounded figures in distributions. Also, minor differences can be expected for corresponding totals and cell values in various census tabulations.

Additional Data: Census Divisions, Census Subdivisions, Incorporated Communities, Federal Electoral Districts; For Census years 1951, 1961, 1971, 1981 & 1986 substantial data are available on population, families, households, housing, economic characteristics (labour force, occupation, industries, income) and agriculture. For Census years 1966, and 1976 less data are available.

Notes: c - city
t - town
Com - Community
... - Not shown separately
* - Denotes change in boundaries due to annexation, incorporation or boundary reduction.
+ - Denotes change in boundaries but with no change in population or establishment of legal descriptions for boundaries.

The Census Code refers to the Census Division and the Census Consolidated Subdivision that the community is in. The number refers to the Census Division and the letter to the Census Consolidated Subdivision.

Up to the date of incorporation the populations shown were taken from the populations of the unincorporated communities. The populations of the incorporated areas are not strictly comparable to the populations before incorporation. The same is true for boundary changes.

Under "The Municipalities Act", effective April 1, 1980, all Local Improvement Districts (L.I.D.'s) and Rural Districts (R.D.'s) became towns (t) and all Local Government Communities (L.G.C.'s) became Communities (Com.).

1. Disbanded
2. Triton-Jim's Cove-Card's Harbour became Triton in 1980.
3. Cottle's Island - Luke's Arm became Cottlesville in 1980.
4. Dark Cove - Middle Brook - Gambo became Gambo in 1980.
5. Harbour Main became Harbour Main-Chapel Cove-Lakeview in 1977.
6. The boundaries of North West River were reduced in April 1, 1980 by the removal of the settlement called Sheshashit.
7. Includes part of the surrounding area.
8. Coley's Point was annexed by Bay Roberts in 1964.
9. Dark Cove L.I.D. was created in 1962. Middle Brook South was annexed by Dark Cove in 1965. Dark Cove West and Middle Brook North was annexed in 1970. In 1973 name was changed to Dark Cove-Middle Brook-Gambo, L.I.D.
10. Town of Happy Valley was incorporated in 1960; Goose Bay, L.I.D. was incorporated in 1970, and the town of Happy Valley-Goose Bay, was incorporated in 1975.
11. The official Census count for Woody Point for 1966 was 444. Sixty-two persons were erroniously left out and have been added back to Woody Point to make 506.
12. Pasadena - Midland previous to 1971 census.
13. After the 1976 Census the Local Improvement District of Buchans amalgamated with Buchans, the unincorporated company town, to form the new town of Buchans. The population counts for 1966 to 1976 do not include the company town. However, the population for the company town of Buchans is as follows:

1951	1956	1961	1966	1971	1976
1,944	2,413	2,463	2,159	1,907	1,557

14. Incorporation included the former unincorporated communities of Trepassey, Trepassey Lower Coasts and Daniel's Point, L.G.C. This explains why no population is shown for Daniel's Point for 1971.
15. Bay Roberts, town annexed Bay Roberts East L.G.C. and part of the surrounding unorganized area in 1965 and the town of Coley's Point in 1964.
16. Listed separately as Bay D'Espoir and Milltown, Bay D'Espoir previous to 1971 census.
17. In 1976 & 1981 the unincorporated community of English Point was mistakenly included in Forteau. English Point had 108 persons in 1976 and 112 in 1981. These counts have not been removed from the official counts for Forteau. Also, the settlement of L'Anse Amour was mistakenly included in the 1981 population for L'Anse Amour, however there were 29 persons in 1976.
18. Mouse Island was annexed by Channel-Port aux Basques in 1964.
19. The towns of Corner Brook East, Corner Brook West, Curling and part of the surrounding unorganized area amalgamated to form Corner Brook city on January 1, 1956.
20. Lawrence Pond amalgamated with Conception Bay South in 1985.
21. South Brook, Humber District amalgamated with Pasadena in 1985.

SECTION B

HEALTH AND WELFARE

SECTION "B"

Table B-1

Physicians

Represents persons active on a full and part time basis (at year end) in occupation group number 3111 of Statistics Canada, Occupational Classification Manual 1971, defined as follows:

"This group includes occupations concerned with diagnosing, preventing and treating diseases and illnesses in humans. Includes occupations of general practitioners in medicine and surgery; and specialists in medicine such as anaesthetistis, neuro-surgeons, urologists, cardiologists, gypaecologists, pathologists, psychiatrists, and radiologists. Interns and resident physicians in hospitals are in this group."

Dentists

Represents persons active on both a full and part time basis (at year end) in occupation group number 3113 of Statistics Canada, Occupational Classification Manual 1971, defined as follows:

"This group includes occupations concerned with examining, diagnosing, preventing and treating ailments or abnormalities of gums and teeth, including oral surgery. Dental hygienists and assistants are excluded."

Registered Nurses

Represents nurses employed on both a part-time and full-time basis as at year end. Occupation groups 3130 and 3131 of Statistics Canada, Occupation Classification Manual 1971, defined as follows:

"This group includes occupations concerned with supervising and co-ordinating the activities of personnel engaged in nursing and related tasks and occupations concerned with giving nursing care to the sick, injured and infirm; giving nursing advice; assisting physicians and performing other nursing tasks in establishments; such as, hospitals, clinics, schools, industrial plants, private and nursing homes."

Table B-2

Operating Hospitals

Are health care institutions, in operation at the end of the reporting period, Decmeber 31 until 1975 and March 31 from 1976 and following years, where patients are accommodated on the basis of medical need and are provided with continuing medical care and supporting diagnostic and therapeutic services, and which are licensed or approved as hospitals by a provincial government.

Approved Bed Complement:

The number of beds and cribs (bassinets) approved for the hospital, or a unit of the hospital, as at year-end of the reporting year, by the Provincial authority.

Admission:

The official acceptance into a hospital of a patient (including an infant born alive in the hospital) who requires medical and hospital services including room and board.

Inpatient:

Is a person who has been admitted to a hospital for medical and hospital services and who has been assigned an inpatient bed.

Table B-3

Employable Cases:

Able bodied individuals or heads of families in receipt of basic social assistance. These persons do not expect to have the necessary income in the short run to maintain themselves or their families for one of the following reasons: a) long term unemployment; b) seasonal unemployment: c) insufficient earnings from full-time employment; d) insufficient earnings from part-time employment.

Other Cases:

a) Persons in receipt of basic social assistance who do not expect to have the necessary income in the short run to maintain themselves or their families for reasons other than unemployment and insufficient earnings; a small number of these persons are also in receipt of long term assistance, and are also counted as long term assistance cases. Therefore some double counting does occur in the "Other Cases" category.

b) Persons in receipt of long term social assistance for social or physical reasons who do not expect to have the necessary income to maintain themselves or their families.

c) Persons in receipt of Blind Persons Allowance and Disabled persons Allowance.

Persons Dependent Upon

Individuals and heads of families and persons in families dependent upon Social Assistance.

Basic Social Assistance

Assistance received in one or more of the following forms: food; fuel; rent; clothing and personal care; household maintenance and utility; board and lodging.

Special Social Assistance

Assistance received in one or more of the following forms: Burials; housekeeper allowance; travelling; storage/transportation household effects; repairs to houses.

Table B-6

Canada Pension Plan

The Canada Pension Plan, which started in 1966, is a contributory social insurance program designed to help people who work in Canada build a better future for themselves and their families by providing a basic level of protection against the contingencies of retirement, disability and death. The Plan operates in all parts of Canada, except in the Province of Quebec, which has its own similar pension program. However, the plans are closely co-ordinated so that contributors are protected wherever they may work in Canada. The amounts payable for each type of benefit available under the Plan are adjusted annually in accordance with the Consumer Price Index.

Retirement Pensions

Retirement pensions were first payable in January 1967 with the pensionable age being lowered gradually to age 65 by 1970. Generally speaking, the retirement pension can be calculated at 25 percent of the current value of the contributor's monthly pensionable earnings averaged over the entire period in which he/she could have contributed to the Plan. A person must contribute to the Plan for a minimum of ten calendar years to qualify for a full Retirement Pension.

Disability Pension

Disability pensions are available to contributors who have severe and prolonged physical or mental impairment that prevents them from pursuing any substantially gainful occupation. A monthly benefit amount is paid for each dependent child of a disabled contributor (Disabled Contributor's Child's Benefit).

Survivors Benefit

Survivors benefits include a lump sum Death Benefit payable to the estate of the deceased contributor; a monthly pension payable to the surviving spouse; and monthly benefits for the dependent children of the deceased contributor (orphan's benefits).

Combined Pensions

Combined pensions refers to the amount a person may receive through a retirement of a disability pension together with a surviving spouse's pension.

1. Commencing January 1974 Family Allowances were payable on behalf of children under 18 years of age who were wholly or substantially maintained by a parent or other individual resident in Canada. Prior to that time Family Allowance was paid on behalf of children under 16 years who had to be not only dependent but also attending school in accordance with provincial law.

   The rate structure for Family Allowance Payments changed over time. To September 1973 monthly rates ranged from $5 to $8 per child depending on the age of the child. Commencing October 1973 a similar allowance was paid to all children regardless of age increasing from $12.00 per child in October 1973 to $20.00 in January 1974; to $22.08 in January 1975; $23.89 in January 1977, $25.68 in January 1978; back to $20.00 in January 1979; to $21.80 in January 1980; $23.96 in January 1981; $26.91 in January 1982; $28.52 in January 1983; $29.95 in January 1984; $31.27 in January 1985; $31.58 in January 1986 and to $31.93 in January 1987.

2. Commencing in 1978 Child Tax Credit could be claimed by the person who received Family Allowance as of December of the tax year. Payments were $200 per eligible chold and this amount was reduced by 5% if family net income was over $18,000 in 1978; $218 in 1979 and reduced by 5% if family net income was over $19,620; $238 in 1980 and reduced by 5% if family net income was over $21,380; $261 in 1981 and reduced by 5% if family net income was over $23,470; $343 in 1982 and 1983 and reduced by 5% of family net income was over $26,330.

Notes: 1 - The Old Age Security Act effective January 1952, provided flat rate benefits to everyone who met age and residence requirements. The age of eligibility was at first 70, but it was lowered to 69 in 1966, and progressively by one year in each succeeding year to 65 in 1970. Residence requirements have varied over time as have monthly benefit rates. From the inception of the program to 1967 monthly rates increased from $40.00 to $75.00. Since 1967 monthly payments have been inflated through various means increasing to $285.20 in January 1986. From October 1973 to December 1982 the old age security pension was escalated quarterly at the full rate of increase in the Consumer Price Index. From January 1983 the Federal Government wage & price guidelines of 6% & 5% were applied.

2 - The Guaranteed Income Supplement program which became operative in January, 1967, was established to supplement the income of Old Age Security recipients so that their monthly income from all sources would not fall below specified levels. Full or partial supplement would be paid to the recipient based on the income of the pensioner and his spouse in the calendar year preceding the benefit year. The maximum supplement has increased over time from $30.00 in January 1967 to $338.95 in January 1986 for single and one-pensioner families and from $60.00 to $220.75 each over the same period for two-pensioner families. Guaranteed Income Supplement payments have been escalated quarterly since April, 1973 by the full increase in the Consumer Price Index.

3 - Data shown for 1969-70 and 1971-72 are as of May 1970 and 1972 respectively.

4 - In October, 1975 an additional program was introduced to provide monthly allowances to spouses of Old Age Security Pension recipients, with spouses between 60 and 65 years of age and meeting resident requirements qualifying. Maximum monthly spouses allowances increasing from $209.81 at the inception of the program to $505.95 in January 1986. Data shown for fiscal year 1975-76 relate to the period "October - March" only.

SECTION C

LABOUR FORCE

SECTION "C"

Table C-1

Employed

The employed includes all persons who, during the reference week:

a) did any work* at all

b) had a job but were not at work due to:
- own illness or disability
- personal or family responsibilities
- bad weather
- labour dispute
- vacation
- other reason not specified above (excludes persons on lay-off and persons whose job attachment was to a job to start a definite date in the future).

* Work includes any work for pay or profit. That is, paid work in the context of an employer - employee relationship, or self-employment. It also includes unpaid family work where unpaid family work is defined as unpaid work which contributed directly to the operation of a farm, business or professional practice owned or operated by a related member of the household.

Labour Force

The civilian labour force is composed of that portion of the civilian non-institutional population 15 years of age and over who, during the reference week, were employed or unemployed.

Not In The Labour Force

The not in the labour force is that portion of the civilian non-institutional population 15 years of age and over who, during the reference week, were neither employed nor unemployed.

Participation Rate

The participation rate represents the labour force as a percentage of the population 15 years of age and over. The participation rate for a particular group (age, sex, marital status, etc.) is the labour force in that group expressed as a percentage of the population for that group.

Unemployed

The unemployed includes those persons who during the reference week:

a) were without work, but actively looked for work in the past four weeks (ending with reference week), and were available* for work

b) had not actively looked for work in the past four weeks but had been on layoff** and were available* for work

c) had not actively looked for work in the past four weeks but had a new job to start in four weeks or less from reference week, and were available* for work.

* Persons in this group meeting the following criteria are regarded as available:

i) were full-time students seeking part-time work who also met condition (ii) below. (Full-time students looking for full-time work are classified as not available for work in the reference week).

ii) reported that there was no reason why they could not take a job in reference week, or, if they could not take a job it was because of "own illness or disability" or "personal or family responsibilities" or "already had a job".

** Persons are classified as being on layoff only when they expect to return to the job from which they were laid off. Prior to 1984 the criteria used was "... on layoff for 26 weeks or less". During 1983 this restriction was dropped.

Unemployment Rate

The unemployment rate represents the number of unemployed persons as a per cent of the labour force. The unemployment rate for a particular group (age, sex, marital status, etc.) is the unemployment in that group expressed as a per cent of the labour force for that group.

Employment/Population Ratio

The Employment/Population Ratio is the number of employed persons as a per cent of the population 15 years and over.

Table C-2

See Table C-1

Table C-3

For 1986 data see Table C-1

For 1951, 1961, 1971, 1976 and 1981 data:

Labour Force

Refers to non-inmates 15 years and over who, in the week prior to enumeration, worked for pay or profit, helped in unpaid family work, looked for work, were on temporary lay-off, or had jobs from which they were temporarily absent because of illness, vacation, strike, etc. Persons doing housework in their own home or volunteer work only, are excluded from the labour force. Also excluded are female farm workers who indicated that they helped without pay in a family farm or business for less than 20 hours.

While the labour force concept has changed only marginally since 1951, the questions asked to measure this concept have changed markedly from census to census. Each set of labour force questions has produced different response problems resulting in data which are not entirely comparable. The major response problems since 1951 are: underenumeration of unpaid family workers (1951), underenumeration of unemployed labour force (1961), and overenumeration of female unpaid family workers (1971).

Age

Age classifications are based on a definition which specifies completed years of age at last birthday prior to the reference date.

Table C-4

Labour Force

For 1971 and 1981: The Labour Force concept is the same as the one that is used in Table C-3 with the restriction that persons looking for work who last worked prior to January, 1970, or January, 1980 respectively or who never worked are excluded.

For 1986: See Table C-1

Occupation

Refers to the specific kind of work the person did on the job, as determined by the reporting of the kind of work, the description of the most important duties and the job title. For 1971 and 1981 data relate to the respondent's job in the week prior to enumeration if he or she had a job during that week or the job of longest duration since January, 1970 or January 1980 respectively if not employed in that week. Persons with two or more jobs during the reference week were asked to give the information for the one at which they worked the most hours.

Table C-5

Industry

The industry classes are based on the general nature of the business carried out in the establishment where the respondent was employed as indicated by the reporting of the name of the employer (or by the business name if self-employed) and the kind of business, industry or service engaged in by this establishment. Persons with two or more jobs were to report the information for the job at which they worked the most hours.

Like those of 1971, the 1981 Census data on industry were compiled in accordance with the 1970 Standard Industrial Classification and as far as feasible the 1971 census definition of the labour force. However, the resulting labour force universe still reflects certain differences. First, women working less than 20 hours per week without pay on a family farm were included in this universe in 1981 after exclusion in 1971. Second, the "looking for work" reference period was increased from one week in 1971 to four weeks in 1981. In addition to these changes, the data for the "unspecified or undefined" category were redistributed among new classes created at the major group level.

Employed Labour Force

See "Employed" in Table C-1.

Table C-7

See Table C-1

Table C-8

See Table C-1

Full-Time Employment

Full-time employment consists of persons who usually work 30 hours or more per week, plus those who usually work less than 30 hours but consider themselves to be employed full-time. Part-time employment consists of all other persons who usually work less than 30 hours per week.

Part-Time Employment

See Full-Time Employment.

Note: The data for 1951, 1961, 1971, 1976 & 1981 are from the Census of Canada; the data for 1986 from the Labour Force Survey. The Labour Force Survey coverage is exclusive of inmates of institutions and full-time members of the armed forces. The census data are inclusive of the total population but define inmates as not in the labour force.

Note: The data for 1951, 1961, 1971 and 1981 are from the Census of Canada: the data for 1986 are from the Labour Force Survey.

1 - The 1951 and 1961 figures exclude persons looking for work who had never worked before. The 1971 figures exclude persons looking for work, who last worked prior to January 1, 1970 or who never worked. See definitions at beginning of this Section.

2 - Industries for 1951 and 1961 were adjusted on the basis of the 1970 Standard Industrial Classification. 1981 & 1971 data were tabulated on the same basis although some adjustment of the 1971 grouping was necessary to obtain comparable data.

3 - See Note 2, Table A-3 and Note 2, Table C-4.

SECTION D

WAGES AND WORKING CONDITIONS

SECTION "D"

Table D-1

Labour Income

Labour income is the compensation paid to employees for services rendered comprising wages and salaries and supplementary labour income. It includes all such payments made to residents of Canada (Canadians employed by the federal government abroad are considered to be residents of Canada) except those made to the Canadian Armed Forces.

Supplementary Labour Income

Supplementary labour income consists of other expenditures by employers on labour account that can be regarded as payment for employees' services. Included here are employers' contributions to pension funds, employee welfare funds, Unemployment Insurance and Workmen's Compensation. The portion of employers' contributions estimated to be for medical aid and hospitalization is not regarded as a form of employee income but as a payment by business for medical and hospital services.

Wages and Salaries

Wages and salaries include directors' fees, bonuses, commissions and taxable allowances and benefits. A gross concept has been adopted, and wages and salaries are measured before deductions for employees' contributions to income tax, unemployment insurance, pension funds, etc. Wages and salaries paid to self employed persons are excluded.

Table D-2

Industrial Composite

From 1961 to 1982 the term Industrial Composite was used to represent a total of all industries except agriculture, fishing and trapping, education and related services, health and welfare services, religious organizations, private households and public administration and defence. The employment in the Industrial Composite varied but generally was around 55% of total employment.

From 1983 on the term Industrial Aggregate was used. The Industrial Aggregate covered all those covered by Industrial Composite, above, plus education and related services, health and welfare services and public administration.

Table D-3

Beneficiaries

Beneficiaries represent the number of persons drawing $1.00 or more of unemployment insurance benefit for one week out of each month. The week chosen is the same as that used by the Labour Force Survey (See Table C-1).

Contributor

Contributors are persons in insurable employment for whom deductions from earnings are made for unemployment insurance in a given year. Insurable employment refers to all paid workers in the labour force and members of the Armed Forces. The main exceptions are persons working fewer than 15 hours per week or earning less than 20% of the maximum weekly insurable earnings ($85 in 1984).

Persons Who Received Benefits

This represents the number of persons receiving $1.00 or more of unemployment insurance benefit in a given year. It is an unduplicated count of beneficiaries for the calendar year and should not be compared with the average number of beneficiaries per month (above). A beneficiary could be reported several times in the monthly statistics whereas the same person would be shown here only once.

Notes: 1 - Includes recreational, business, personal and miscellaneous services only.

2 - Prior to April, 1983 the data are from Statistics Canada's Employment Survey. The Employment Survey (or ES1) covered larger firms only, ones that employed 20 or more employees in any month of the year. The survey excluded agriculture, fishing & trapping, education and related services, health & welfare services, religious organizations, private households & public administration & defence. Starting with March, 1983 Statistics Canada replaced the ES1 with the new Survey of Employment Payrolls & Hours (SEPH). SEPH is a broader based survey with all industries covered, with the exception of agriculture, fishing & trapping, private households, religious organizations & military serwices. SEPH covers all firms, both large & small.

3 - Prior to April, 1983 the ES1 survey produced average weekly earnings for "Commercial Services" as defined in footnote 1. After 1983 the SEPH survey produced data for all of the service industry, namely, Community, Business & Personal Service Industries. See footnote 2.

Additional Data: Monthly; Corner Brook, St. John's; More detailed industry data, average hourly earnings, salaried employees and wage earners, hours reported, overtime earnings & hours, data for large firms.

Notes: 1 - Includes Unemployment Assistance.
2 - From 1949 to 1978 the data are net payments, that is, gross payments after adjustments. After 1978 the data are gross payments.
3 The new Unemployment Insurance Act came into force on June 27, 1971. Under this program coverage was almost universal as of January 2, 1972.

Note that the count of beneficiaries cannot be related to the benefit payments made during a month as the latter figure covers all benefits paid during the month whereas the beneficiary count is the actual number qualifying for benefits for a specific week each month regardless of when payment is received.

Additional Data: Monthly; Districts, Census Divisions; age, sex, weeks on claim, type of benefit, occupation.

EDUCATION

SECTION "E"

Table E-1

Public Schools

Schools which are supported by local taxation, supplemented by provincial grants and administered by local school board in accordance with the education act of the province.

Special Classes

Those for students with special problems in the regular curricular of the public school system. The majority of these students are in remedial programs, primarily remedial Mathematics and Reading. To a lesser extent this category also includes students with various handicaps (sight, hearing) which are, however, not so serious as to cause these children to be referred to special institutions for their education.

Table E-2

Teachers

Teachers employed in Public Schools on a full time basis only.

Table E-3

Full-time Students

Up to Spring 1982 Students who are registered for the duration of any semester or session in at least four courses. From the Fall Semester 1982 those who are registered in at least 3 courses.

Partial Students

Up to Spring 1982 students registered in fewer than four courses in any semester were termed Partial Students. From Fall 1982 partial students are those registered in fewer than 3 courses in any semester. Included are part-time off-campus students.

Graduate Students

Students that are formally admitted by the University to a program of studies leading to a Masters or Doctorate Degree or a Graduate Diploma.

SECTION F

PRODUCTION AND INCOME

SECTION "F"

Table F-1

Provincial Gross Domestic Product at Market Prices

Is defined as the market value of the unduplicated total of goods and services produced in a given geographical area in a given period of time . It is measured by summing: (1) the incomes of the various factors of production which are earned within the geographical boundaries of the province and (2) the non-factor costs of capital consumption allowances (depreciation) and (3) indirect taxes net of subsidies which contribute to the market price of goods and services.

For an outline of definitions, concepts and methods related to this table see the source publication or Statistics Canada, Catalogue 13-549E.

Table F-2

Personal Disposable Income

Is the amount left over from Personal Income after payment to government of Personal Direct Taxes (Personal Income Taxes, Succession Duties and estate taxes, and Employer and Employee Contributions to social insurance and government pension funds) and various other fees, licences and permits. This amount is available to be spent on consumer goods and services, transferred to other sectors, or saved.

Wages, Salaries and Supplementary Labour Income

Wages and salaries cover all of the earnings from employment of Canadian residents paid for work performed, including payments in kind such as free board and lodging. Also included are such payments as commissions, directors' fees tips and bonuses, and taxable allowances such as cost-of-living allowances and allowances in respect of holidays and sick leave. The estimates do not include earnings from self-employment or partnership, income from independent professional practice, income of farmers from farming operations, or military pay and allowances. Wages and salaries are estimated before tax deductions, and before contributions of employees to unemployment insurance, pensions, and other social insurance schemes.

Supplementary labour income consists of other expenditures by employers on labour account that can be regarded as payment for employees' services. Included here are employers' contributions to pension funds, employee welfare funds, unemployment insurance, and workmen's compensation.

Net Income of Non-Farm Unincorporated Business (Including Rent)

Net income of non-farm unincorporated business consists of the earnings of working proprietors from their own business in the form of wages and salaries, profits, interest, and rents. Such businesses are "unincorporated" as distinct from the corporate forms of organization. Included in this income category are the earnings of professional practitioners such as doctors, dentists, lawyers and engineers and also earnings of self-employed fishermen.

Also included is the net rental income (gross rents less expenses) of persons and unincorporated business, including imputations for owner-occupied dwellings.

Interest, Dividends & Miscellaneous Investment Income of Persons

Includes incomes received by persons & unincorporated business from corporations, government business enterprises, and non-resident sources in the form of interest and dividends; interest on the public debt paid to persons; and the interest accruing on private pension funds, life insurance funds, and on funds invested by other "associations of individuals".

Government Transfer Payments to Persons

Is comprised of unilateral payments from governments to persons for which there has been no exchange of goods and services, i.e. family and youth allowances; unemployment insurance benefits; veterans' pensions; old age security fund payments; Canada and Quebec Pension Plan benefits; direct relief; workmens compensation benefits; grants to non-commercial institutions (post-secondary education institutions and benevolent associations); etc. Excluded is interest on the public debt.

Other

Includes Military Pay and Allowances; Net income received by farm operators from farm production; current transfers in the form of capital assistance grants from government to unincorporated business charitable and other contributions to non-commercial institutions from corporations; and transfers to persons from the non-resident sector such as personal and institutional remittances and pensions received from abroad.

Table F-3

See Table F-2

Table F-4

Gross Domestic Product at Factor Cost

Is defined as a measure of the unduplicated value of goods and services produced in a geographical area during a given time period. It is measured by summing (1) the incomes of the various factors of production which are earned within the boundaries of the geographical area and (2) the non-factor cost of capital consumption allowances (depreciation).

For an outline of definitions, concepts and methods related to this table see the source publication or Statistics Canada, catalogue 13-549E.

Table F-5

Census Family

See Table P-7.

Income

Income is comprised of that received from wages and salaries, business or professional practice, farm operations, family and youth allowances, government old age pensions, unemployment insurance, social assistance, other government payments, retirement pensions from previous employment, bond and bank interest and dividends, other investment sources and other sources.

Table F-6

Gross Domestic Product at Market Prices by Type of Expenditure

Provincial Gross Domestic Product at market prices by type of expenditure measures output as the sum of all sales of the provinces output to final purchasers i.e. to consumers, governments, businesses (on capital account), and export markets. In compiling the Gross Domestic Product by Expenditure series adjustments are made for the following:

1) Unsold output which is not sold to the final purchasers but contributes to inventory stock and;

2) Imported goods and services which are purchased by the final consumer but not produced within the province.

For an outline of definitions, concepts and methods related to this table see the source publication or Statistics Canada, catalogue 13-549E.

Table F-7

Government Sector

In the Accounts the government sector is defined to cover three main groups of activity:

1) Departmental activities of the three levels of government - federal; provincial and local - ordinarily included in the so-called "budgetary" transactions of governments;

2) the transactions of many government administered social insurance and trust funds such as the Unemployment Insurance Fund, the old age Security Fund, Workmen's Compensation Funds, the Canada Pension Plan, and various government employee pension funds - ordinarily regarded as "extra - budgetary" transactions of governments;

3) the transactions of various government agencies, commissions, and boards which are financed out of public funds, and therefore operate on essentially non-commercial basis. i.e. such federal agencies as the National Research Council, the National Film Board etc; such provincial agencies as hospital and health services commissions, and various municipal boards and agencies including school boards and municipal waterworks authorities.

Specifically excluded from the government sector are certain government agencies whose activities involve the production of goods and services for sale on the open market at a price to the consumer which is intended to compensate wholly or largely for their costs or to yield a profit. Such agencies are classified in the Accounts as Government Business Enterprises.

Surplus or Deficit on a National Accounts Basis:

The saving out of current income and outlay (total revenue less total current expenditure), together with capital consumption allowances, provide the source of financing for the government sector's expenditure in physical assets (gross capital formation). The surplus (+) or deficit (-) on these capital financing transactions provides a measure of the overall fiscal posture of the government sector;

For an outline of definitions, concepts and methods related to this table see the source publication or Statistics Canada catalogue 13-549E.

Notes: 1 - With the exception of Personal and Corporation Income Tax, rates are in effect April 1 unless otherwise specified.

2 - Since, 1962, Personal & Corporation Income Taxes have been collected on behalf of the Province by the Federal Government. Prior to this time the Tax Rental Agreement was in effect. The rates shown for Personal Income Tax from 1962 represent the provinces share of Federal "basic" Personal Income Tax. The rates shown for Corporation Income Tax represent the % of that tax collected by the Federal Government & abated to the Province. Rates shown for the both Personal and Corporation Tax are effective January 1, unless otherwise specified.

3 - Effective March 29, 1949. 4 - Effective November 15, 1950. 5 - Effective prior to 1949. 6 - Act passed May 20, 1953.

7 - Effective April 1. 8 - Effective July 1. 9 - Repealed September 1, 1968. 10 - Effective June 10. 11 - Effective June 1.

12 - Effective April 11. 13 - Effective November 25. 14 - Effective July 1. 15 - Effective March 27.

16 - Rate of 56.6% effective January 1, 1977 reflecting extra tax points allocated to the Province under the Federal-Provincial Arrangements and Established Programs Financing Act. The rate increased to 58.0% effective July 1, 1977.

17 - Effective May 1st. 18 - 12% on small business to 1983; 10% commencing 1984.

19 - Effective March 18. Retail Sales Tax reduced to 8% six months beginning April 10, 1978.

20 - Effective July 20. 21 - Per 25 gram unit commencing July 20, 1979.

22 - New taxes effective July 20, 1979 were: i) Aviation Fuel Tax of 7/10 of 1 cent per litre applying only to flights both commencing and terminating in North America; ii) 4% tax on all forms of media advertising. Advertising costing less than $20 or placed in publications of non-profit organizations is not taxable.

23 - Effective March 28.

24 - Effective April 15, 1981 the basis of calculating gasoline and diesel fuel tax was changed from cent per litre to % of average retail price per litre. Comparable rates per litre resultant from this change are:

	Gasoline Cents	Diesel Fuel Cents
April 15, 1981	7.1	8.2
April 1, 1982	7.9	9.4
April 1, 1983	9.6	11.2
April 1, 1984	9.9	11.6
April 1, 1985	10.8	12.5
April 1, 1986	10.9	13.7

From April 15, 1981 to March 31, 1984 the rate of tobacco tax was adjusted quarterly on the basis of escalations in the Tobacco Products price index.

25 - Effective May 27. 26. Effective November 19. 27. Effective April 26, 1986.

SECTION I

PRICE INDEXES

SECTION "I"

Table I-1

Consumer Price Index

The Consumer Price Index measures the percentage change through time in the cost of purchasing a constant "basket" of goods and services representing the purchases by a particular population group in a specified time period. The "basket" is an unchanging or equivalent quantity and quality of goods and services, consisting of items for which there are continually measurable market prices over time.

Table I-2

Family - The family or spending unit is defined as a group of persons dependent on a common or pooled income for the major items of expense and living in the same dwelling or one financially independent individual living alone. Never married sons or daughters living with their parents are considered as part of their parents spending unit. In the great majority of cases members of spending units with two or more persons are related by blood, marriage or adoption, and are thus consistent with the "economic family" definition employed in surveys of consumer finance.

Table I-3

House 1

This is a basic detached wood-frame bungalow with clapboard, metal or patent siding (rarely brick) five to eight years old with 3 bedrooms, 1 1/2 bathrooms, fireplace and one car garage in full basement but no recreation room or appliances. The total area of the house using outside dimensions but not including the garage is 1,200 square feet and the house is situated on a fully serviced 5,500 square foot lot. The house is typical of others in the neighbourhood. The neighbourhood itself is average and within average commuting distance of the city centre.

House 2

This is a detached 2 storey wood-frame house with stone or brick veneer front, patent siding elsewhere, five to eight years old with 4 bedrooms, 2 1/2 bathrooms, main floor family room, 1 fireplace, 2 car attached garage and full basement but no recreation room and no appliances. The total area of the house using outside dimensions but not including the garage is 2,000 square feet and the house is situated on a fully serviced 7,500 square foot lot. The house is typical of others in the community. The location is prime residential and is within average commuting distance of the city centre.

Table J-1

Census Farm

Census Farm - Prior to 1976 is defined as an agricultural holding of one acre or more with sales of agriclutural products during the twelve month period prior to the Census of $50 or more. In 1976 this value was changed to sales of $1,200 or more. In 1981 this value was changed to sales of $250 or more.

Table J-5

Type of Farm

Type of farm indicates that 51 percent or more of sales were in that area of farming.

SECTION K

FISHERIES

SECTION "K"

Table K-7

Fishermen

Engaged in the Fishery is defined to cover the time spent preparing for, actually fishing, and storing boats and gear away after the season. Time spent on repairing boats or gear in the off-season is not included but such time spent in the fishing season is included.

Before 1969 "Engaged in the Fishery" included not only time spent in catching fish, but also time spent on shore preparing boats and fishing equipment, processing fish, repairing shore installations, and performing other unpaid activities connected with the fishery, and also time spent receiving unemployment insurance payments if such payments were earned as a result of fishing activities.

Casual - those who are engaged in the fishery for less than five months.

Full-Time - those who are engaged in the fishery for over 10 months of the year.

Part-Time - those who are engaged in the fishery for a period of over five and up to 10 months.

Beginning with 1980 there is not a set number of months for the province that a person has to fish to be considered full-time and part-time. If a person fishes consistently for the fishing season set out in his area then he is considered full-time, the length of the fishing season varies from Area to Area.

Table K-1

Groundfish

Fish that generally feed and dwell near the bottom of the sea, eg. cod, haddock, redfish, flounder, halibut, etc.

Molluscs and Crustaceans

Fish that usually live in water close to the bottom, have hard shells, joined appenddages and generally travel limited distances, eg. crab, shrimp, squid, etc.

Pelagic

Species that feed in mid-water or near the surface eg. herring, capelin, mackerel, etc.

Roundweight

The weight of the fish when taken out of the water, ie. live weight.

Table L-1

A logging establishment is a unit which is engaged in logging and related activities (such as felling, bucking, skidding, hauling, trucking, booming, towing, etc.). In most cases the establishment coincides with the firm. However, firms that have more than one establishment are requested to submit a separate census of logging report for each logging establishment which can meet the reporting requirements under the definition of an "establishment".

The number of establishments represents the number of operating units that are principally engaged in logging activities. These units do not represent the total number engaged in logging operations. Numerous logging operations are conducted by establishments classified to other industries (e.g., the sawmill industry) and by farmers and other individuals.

Table L-5

Timber Royalties - is the charge that the government levies on timber cut on crown lands.

SECTION M

MINING

Table M-2

Metallic Minerals

Includes: cadmium, copper, gold, iron ore, lead, silver and zinc.

Non-Metallic Minerals

Includes: asbestos, fluorspar, gypsum, quartz and pyrophyllite.

Structural Materials

Includes: clay products, cement, sand and gravel, and stone.

Table M-3

Cost of Materials and Supplies, Fuel and Electricity

Generally, consumption of purchased items, only, at laid down cost. Includes, inter-company and intracompany transfers, contract work by others and fuels used by vehicles.

Establishment, Mining

Beginning with the 1961 Census of Mines, Quarries and Oil Wells, the establishment is defined as the smallest unit which is a separate operating entity capable of reporting all the following: materials and supplies used goods purchased for resale as such; fuel and power used; number of employees and their pay; man-hours; inventories; and shipments or sales.

Value Added

Net output as measured by gross output less purchased commodity input used and contract work by others.

a) Value added, mining activity: Value of shipments plus net change in inventory of goods in process and finished goods, less cost of materials and supplies used, fuel and electricity.

b) Value added, total activity: Consists of (1) value added, mining activity and (2) value added, non-mining activity. The latter is calculated by subtracting relevent commodity inputs from non-mining revenues or outputs; these commodity inputs are net of the change in inventories of goods purchased for resale. Non-mining revenues includes depreciable fixed assets produced by own work force for own use, revenue from product rentals, etc., but exclude non-operating revenue such as real property rentals, dividends and interest.

Note: * - Tons = 2000 lbs.
The value of production in this table and in Table M-2 differs from the value of production in Table M-3. For the most part the difference is caused by the transfer of iron ore from Labrador to Quebec for shipment to purchasers. In this table and in table M-2 the value added in Quebec and the transportation costs through Quebec are included whereas in Table M-3 these costs have been removed.
1 - Shipments of flourspar in 1975 were curtailed due to labour dispute.
2 - The needs of the ERCO plant for silica(Quartz)in 1977 were met from existing inventories. Production continued in 1978
3 - The fluorspar mine at St. Lawrence closed in February 1978.

Notes: 1 - From 1976 on a new procedure for collection and tabulations of data was started.
2 - No offshore drilling was undertaken in 1977. Some marine geophysical surveys were done.
3 - From 1980 onward the breakdown of expenditure by level of government is not available.

SECTION N

MANUFACTURING

SECTION "N"

Table N-1

Cost of Materials and Supplies, Fuel and Electricity

Generally, consumption of purchased items only, at laid down cost. Includes inter-company and intra-company transfers, contract work by others and fuels used by vehicles.

Employees, Salaries and Wages

Salaries and wages are reported before deductions for income tax and employee benefits and comprise all person-hours paid (for regular work, overtime and paid leave) as well as bonuses, commissions, etc., paid to regular employees. Where shown, production and related workers classified to non-manufacturing activity include separately reported loggers, employees on construction for own use: beginning with the 1970 Census outside pieceworkers formerly included for certain industries are excluded from all employment totals and their remuneration treated as contract work done by others. Sales and distribution employees include all personnel charged to selling expense, certain drivers, etc.

Establishment

Smallest operating unit capable of reporting certain specified input and output data, usually a plant or mill.

Shipments of Goods of Own Manufacture

Goods made by reporting establishment, or for its account, from its own materials, net of discounts, returns, allowances, sales tax, excise taxes and duties, returnable containers, common or contract carriers' charges for outward transportation (but not of own carriers' delivery expense). Includes repair and custom revenue, transfers to reporting units of same firm, all exports, book value of own products shipped on rental basis. Unsold domestic consignment shipments are included in inventory. In fabricated structural metal industry, aircraft & aircraft parts manufacturers, railroad rolling stock industry and shipbuilding and repair, value of production is shown in place of shipments in tables on principal statistics.

Value Added

Net output as measured by gross output less purchased commodity input used and contract work by others.

a) Value added, manufacturing activity: Value of Shipments of goods of own manufacture plus net change in inventory of goods in process and finished goods, less cost of materials and supplies used, fuel and electricity.

b) Value added, total activity: Consists of (1) value added, manufacturing activity and (2) value added, non-manufacturing activity. The latter is calculated by subtracting relevent commodity inputs from non-manufacturing revenues or outputs; these commodity inputs are net of the change in inventories of goods purchased for resale. Non-manufacturing revenues includes depreciable fixed assets produced by own work force for own use, revenue from product rentals, etc., but exclude non-operating revenue such as real property rentals, dividends interest.

Table N-2

See Table N-1

Food and Beverage Industries

Includes: Meat and Poultry Products Industries; Fish Products Industries; Fruit and Vegetable Processing Industries; Dairy Products Industry; Flour and Breakfast Cereal Products Industry; Feed Industry; Bakery Products Industry; Miscellaneous Food Industries; and Beverage Industries.

Table N-3

See Table N-1

Fish Products Industry

Includes: establishments primarily engaged in canning, filleting, freezing, curing or otherwise processing fish, molluscs or crustaceans. Establishments primarily engaged in the production of fish meal or oil or marine oil, or in the harvesting and drying of marine vegetable products are also included.

Table N-4

See Table N-1

Wood Industries

Includes: Sawmills, Planing Mills and Shingle Mills; Veneer and Plywood Mills; Sash, Door and other Millwork Plants; Wooden Box Factories; Coffin and Casket Industries; and Miscellaneous Wood Industries.

Table N-5

See Table N-1

Sawmills and Planing Mills

Includes: establishments primarily engaged in sawing and planing lumber and those producing ties, spoolwood, lath and other mill products such as cooperage stock and box shooks from round wood.

Table N-6

See Table N-1

Pulp and Paper Mills

Includes: pulp mills producing chemical or mechanical pulp, and combined pulp and paper mills and paper mills manufacturing newsprint, book and writing paper, kraft paper, paper-board, and building and insulation board.

Table N-7

See Table N-1

Printing, Publishing and Allied Industries

Includes: Commercial Printing; Platemaking, Typesetting and Trade Bindery Industry; Publishing Only; and Publishing and Printing.

Table N-8

See Table N-1

Non-Metallic Mineral Products

Includes: Clay Products Manufacturers; Cement Manufacturers; Stone Product Manufacturers; Concrete Products Manufacturers; Ready-Mix Concrete Manufacturers; Glass and Glass Products Manufacturers; Abrasives Manufacturers; Lime Manufacturers; and Miscellaneous Non-Metallic Mineral Products Industries.

Table N-9

See Table N-1

Metal Fabricating Industries

Metal Fabricating Industries (except Machinery and Transportation Equipment Industries) includes: Boiler and Plate Works; Fabricated Structural Metal Industry; Ornamental and Architectural Metal Industry; Wire and Wire Products Manufacturers; Hardware, Tool and Cutlery Manufacturers; Heating Equipment Manufacturers; Machine Shops; and Miscellaneous Metal Fabricating Industries.

Table N-10

See Table N-1

Chemicals and Chemical Products Industries

Includes: Manufacturers of Mixed Fertilizers; Manufacturers of Plastics and Synthetic Resins; Manufacturers of Pharmaceuticals and Medicines; Paint and Varnish Manufacturers; Manufacturers of Soap and Cleaning Compounds; Manufacturers of Toilet Preparations; Manufacturers of Industrial Chemicals; and Miscellaneous Chemical Industries.

Table N-11

See Table N-1

Transportation Equipment Industries

Includes: Aircraft and Aircraft Parts Manufacturers; Motor Vehicle Manufacturers; Truck Body and Trailer Manufacturers; Motor Vehicle Parts and Accessories Manufacturers; Railroad Rolling Stock Industry; Shipbuilding and Repair; Boatbuilding and Repair; and Miscellaneous Vehicle Manufacturers.

Notes: 1 - Data for the 1957-1969 period are compiled on the basis of the 1960 Standard Industrial Classification; for 1970 to 1983, on the 1970 Standard Industrial Classification and 1984 on the 1980 Standard Industrial Classification.

2 - Beginning with 1970, the cost of fuel and electricity for small establishments is included in the cost of materials and supplies.

3 - Beginning with 1961, when statistics were first published for "Manufacturing Activity" and "Total Activity", data on "Total Employees" and "Total Salaries and Wages" are not directly comparable with earlier statistics under the same headings.

Additional Data: Monthly; Census Division, Larger Urban Centres; More detail.

SECTION O

INVESTMENT

SECTION "O"

Table O-1

Capital Expenditures

Include the cost of procuring, constructing and installing new durable plant and machinery, (which normally have a life of more than one year) whether for replacement of worn or obsolete assets, or as net additions to existing assets. Included are all capitalized costs such as architectural, legal and engineering fees, as well as the value of work on capital assets undertaken by firms with their own labour force. Gross outlays are reported without any deduction for scrap or trade-in value of old assets. Excluded are expenditures made for the acquisition of previously existing structures, for used machinery and equipment unless imported and for land since outlays of this type involve only the transfer of property and not the creation of a capital asset.

Construction

Includes building construction and all types of engineering construction such as roads, dams, transmission lines and pipelines, as well as oil drilling and mine development. The machinery and equipment category takes into account the purchase of all such items which are used either in producing goods or providing services but does not cover durable goods purchased for personal use. Included, as well as industrial machinery, are transportation equipment, agricultural implements, professional and scientific equipment, office and store furnishings and other similar capital goods. Excluded for the purpose of this report, are outlays for machinery and equipment by the Department of National Defence.

Housing

Housing is not generally considered a capital expenditure in the sense mentioned above but it has been included because it forms a large proportion of construction expenditures and has cyclical fluctuations similar to those which characterize business, institutional and government capital expenditures.

The Repair Expenditures

Represent the non-capitalized outlays made to maintain the operating efficiency of the existing stock of durable physical assets. These repairs and maintenance expenditures exclude, however, the routine care of assets such as in oiling and cleaning of machinery. Where the repair costs are large enough to materially lengthen the expected serviceable life of the assets, increase its capacity or otherwise raise its productivity, they are treated as capital expenditures on new construction or on new machinery and equipment.

Table P-2

Apartment

An apartment is a dwelling unit in an apartment building (multi-dwelling structure other than a double house or row house), or a house that has been converted into apartments. This includes dwelling types such as triplexes, quadruplexes, etc. or apartments in a non-residential building such as a school, or over a store.

Duplex Dwelling

A duplex is one of two dwelling units located one above the other in a building adjoining no other structure.

Dwelling

A dwelling is a structurally separate set of living premises with a private entrance either outside the building or from a common hall, lobby, vestibule or stairway inside the building. The entrance must be one that can be used without passing through anyone else's living quarters.

Row Dwelling

A row dwelling is a one family dwelling unit in a row of three or more attached dwellings separated by common or party walls extending from ground to roof.

Semi-Detached Dwelling

A semi-detached dwelling is one of two dwellings located side-by-side in a building, adjoining no other structure and separated by a common or party wall extending from ground to roof.

Single-Detached Dwelling

A single detached dwelling is a building containing only one dwelling unit, which is completely separated on all sides from any other dwelling or structure.

Family (Census Family)

A census family consists of a husband and wife (with or without children who have never been married, regardless of age) or a parent with one or more children never married, living in the same dwelling. A family may consist, also, of a man or woman living with a guardianship child or ward under 21 years for whom no pay was received.

Household

A person or a group of persons occupying one dwelling unit is defined as a household. The number of households will therefore be equal to the number of occupied dwellings.

SECTION S

ENERGY

SECTION "S"

Table S-1

Commercial Rates

Includes users of electricity that pay a commercial rate as defined by the seller. Retail stores, schools and hospitals are included in commercial rates.

Domestic

Includes users of electricity that pay a domestic rate as defined by the seller. Usually includes residential use, such as private homes, apartments and cottages. Large apartments with one meter i.e. bulkmetered apartments may be classified under general service. Domestic also includes farm. In 1980 the categories were changed, under the new format the categories of Residential and Agriculture approximate the Domestic category.

Farm

Includes users of electricity that pay a farm rate as defined by the seller.

Industries

Includes establishments engaged in the generation, transmission and distribution of electricity not classified as utilities.

Power Rates (General Service Rates)

Includes users of electricity that pay a power rate as defined by the seller. Large farms and bulk-metered apartments are included in power rates.

Utilities

Includes establishments primarily engaged in the generation, transmission and distribution of electricity, whether owned by governments or not.

Watt-Hour

A watt-hour is a unit of work equal to the power of one watt operating for one hour.

Table S-2

Installed Generating Capacity

Installed generating capacity is the nameplate rating of a generator. It is the capacity as designed.

Kilowatt

A kilowatt equals one thousand watts. A watt is the meter-kilogram-second unit of power, equivalent to one joule per second and equal to the power in an electrical circuit in which a current of one ampere flows across a potential difference of one volt.

Table S-6

B.T.U. (British thermal Unit)

The B.T.U. is the amount of heat required to raise the temperature of one pound of water one degree Fahrenheit.

Aviation Gasoline

Aviation gasoline includes all gasoline type fuels used in piston-type aircraft engines.

Aviation Turbo Fuel

Aviation turbo fuel includes all fuels used in turbo-jet or straight jet aircraft engines.

Diesel Fuel Oil

Diesel fuel oil includes all grades of distillate fuel sold for diesel engine use.

Heavy Fuel Oil

Heavy fuel oil includes all grades of residual type fuels (including low sulphur) for both steam and diesel engines; Bunker fuel oil (including Bunker A, B and C); fuel oils nos. 4, 5, or 6: and residual fuel oil.

Light Fuel Oil

Light fuel oil includes all distillate type fuels for power burners; fuel oil No. 2 (heating oil No. 2); fuel oil No. 3 (heating oil No. 3); furnace fuel oil; gas oils; and light industrial fuel.

Motor Gasoline

Motor gasoline includes all gasoline type fuels used in internal combustion engines other than aircraft.

Stove Oil and Kerosene

Stove oil and kerosene includes distillate type kerosene; kerosene; mineral lamp oil; No. 1 fuel oil; and stove oil (including all vapourizing burner oil).

Table S-7

Occupied Dwelling

Refers to a dwelling in which a person or group of persons is permanently residing.

Notes: * - Includes "No value energy". No value energy is the energy which is inadvertently exchanged and for which there is no financial settlement.
1 - For the years previous to 1964 " Energy used in our plant by utilities" is included with Residual error of estimate.
2 - In 1980 some of the categories for disposal of energy were changed. Under the new format the categories of Residential & Agriculture approximate the category of Domestic & farm in the old format.
3 - Producer Consumption approximates the 2 categories of "Losses & Unaccounted For" and "Energy used in own plant by utilities" of the old format.
4 - From 1974 to present power rates are included with commercial rates.

Additional Data: Monthly; more detail on generation and disposal.

SECTION T

TRADE AND SERVICES

SECTION "T"

Table T-2

Passenger Cars

Denotes all vehicles whose principal function is to carry passengers, including those used for commercial purposes. (i.e. taxis, rented automobiles and limousines, and other fleets).

Commercial Vehicles

This term limited solely to "trucks" and "buses", this designation applies regardless of the use to which such vehicles are put.

Table T-3

Alcoholic Beverages

Volume and value of alcoholic beverages (Canadian and Imported products) sold (i) by liquor authorities to final consumers and to holders of licences to resell; (ii) by wineries and breweries to holders of licences to resell and (iii) by wineries and brewers' retail outlets. Value figures do not represent the final retail selling price of alcoholic beverages as mark-ups by licencees are not included.

Table T-4

Licensed Restaurants

Establishments primarily engaged in preparing and serving meals for consumption on the premises, with a licence to serve alcoholic beverages.

Unlicensed Restaurants

Establishments primarily engaged in preparing and serving meals for consumption on the premises but without a licence to serve alcoholic beverages. Included are establishments referred to as "Drive-Ins", where food is consumed either in the customers' motor vehicles or at tables in or about the premises.

Take-Out Food Services

Establishments primarily engaged in preparing and selling packaged or wrapped food to the public, mostly for consumption away from the premises. Such establishments usually concentrate on certain lines of food such as chinese, pizza, chicken, etc. with more than one line often being offered. Refreshment stands, frequently seasonal, selling such foods as hot dogs, hamburgers, chips and ice cream, are included here.

Caterers (Industrial, social and mobile)

Establishments primarily engaged in preparing and serving food and beverages under contract on others' premises, such as schools, factories and offices, etc. They may also prepare food on their own premises for delivery to parties, receptions, etc., and may also serve the food and provide bar-tending services (social caterers). Mobile caterers who drive to changing locations carrying prepared food, are also included here.

Taverns, Bars and Night Clubs

Establishments primarily engaged in selling alcoholic beverages for consumption on the premises. Food may be sold in minor quantities and entertainment may be provided.

Table T-6

Province of lading indicates the province in which the goods were first laden aboard a carrier for export, which may not in all cases represent the province in which the goods were grown, extracted or manufactured.

Table T-7

Province of clearance indicates the province in which the goods were cleared by Customs either for immediate concumption or for entry into a bonded Customs Warehouse. This may not always coincide with the province in which the goods are consumed or enter the productive process. Goods are usually cleared at the first Canadian port but they can be bonded and travel to destination point for clearance. Therefore, total domestic imports represents only those goods that have been cleared in Newfoundland and for example, not goods that have been cleared in New Brunswick and travelled to Newfoundland at a later date.

POLITICS AND GOVERNMENT

SECTION "V"

Table V-2 and Table V-3

Registered Voters

Registered voters are all those persons who have been enumerated as qualifying voters at a time prior to an election.

Persons Voting

Persons voting are all those persons who cast a ballot at an election . A person casting a ballot need not be a registered voter because the Election Act provides that any person qualified to be a voter but who is not a registered voter may vote in an election after first taking the appropriate oath. Therefore it is possible that the total persons voting could exceed the total registered voters in a provincial election.

Table V-5

Provincial Government Enterprises

A provincial government enterprise is an organized entity, usually corporate, which (a) is established by a political decision-making body to produce goods and/or sevices for sale on the open market at a price related to costs, (b) maintains an independent system of accounts that permits the charging of specific elements of costs against the revenue derived from its sale of goods and/or services, (c) has a relatively autonomous management in the conduct of day-to-day operations, and (d) is staffed by personnel not normally subject to the statutory requirements governing employment in the general public service.

As of 1983 the Provincial Government Enterprises were as follows:

Harmon Corporation; Hotel Building Limited; Marystown Shipyard Limited; Newfoundland Farm Products Corporation; Newfoundland Fiberply Limited; Newfoundland Hardwoods Limited; Newfoundland Liquor Corporation; Newfoundland & Labrador Housing Corporation; Newfoundland & Labrador Hydro; Power Distribution District of Newfoundland & Labrador; St. John's Housing Corporation; United Cotton Mills Limited.

Notes: No. of employees is the average number for the year.
Gross payroll is the total for the year.

Starting the second quarter of 1973 there is a structural change in this table. The title Total General Government Employment and Gross Payrolls consists of Government Departments, Administrative, Regulatory and Special Funds and Government Owned and Financially Supported Institutes. This change has resulted in the addition of: Newfoundland and Labrador Computer Services, Newfoundland Farm Products Corporation, Newfoundland Medical Care Commission, College of Trades and Technology, and College of Fisheries, to Government Employment and Payrolls. The only deletion from employment and payrolls is Memorial University of Newfoundland.

Total general government and provincial government enterprises: (1) Number of employees is the sum of the average of general government and government enterprises employees, (2) gross payroll is the sum of the gross payrolls of general government and government enterprises.

Additional Data: by month, number of employees and gross payroll by province and type of organization, departmental services and type of employee, of administrative, regulatory and special funds, of government-owned and financially supported institutions and quarterly summaries of salary and wage earners for general government services.

Table W-2

Criminal Code

Under Section 91 of the B.N.A. Act the Parliament of Canada has the exclusive legislative authority on the subject of criminal law, except the Constitution of Courts of Ciminal Jurisdiction, but including the procedure in criminal matters. Within this authority, the Parliament of Canada passed an Act Respecting the Criminal Law R.S.C. 1970 c. C-34. The short title of the Act is the Criminal Code.

Federal Statute

A valid federal statute is the written will of the Parliament of Canada, so long as the purpose of the legislation is within the jurisdiction of Parliament. A federal statute is assented to by the Governor-General of Canada.

Provincial Statute

A valid provincial statute is one passed by the provincial legislature (in Newfoundland this is the House of Assembly) and assented to by the Lieutenant-Governor of Newfoundland. The purpose of provincial legislation must be within the jurisdiction of that legislative body.

Municipal By-Law

Municipal by-laws are a form of subordinate legislation made by local governments who derive their power from the provincial legislature.

SECTION X

ENVIRONMENT

SECTION "X"

All normals are based on a thirty year period and are updated every ten years. The current normals are based on the period 1951 to 1980.

Table X-1

Maximum temperature represents the average highest recorded temperature per day for a given month.

Minimum temperature represents the average lowest recorded temperature per day for a given month.

Table X-2

Degree days is the difference of the daily mean temperature from $18^{o}C$ which is a heating degree standard. For example if the daily mean temperature on a given day in January is $1^{o}C$ then 17 degree day units are required to attain the standard of $18^{o}C$.

Sunshine is recorded as hours and tenths of bright sunshine.

Table X-3

Precipitation levels of rain and snow are not additive to give total precipaitaion. This is because snow (CM) is melted down to give water content (MM) and thus the standard ratio of 10:1 does not necessarily hold true depending on the quality of snow.

Wind direction is the direction (true north) from which wind is blowing.
